

2005 West Nile Virus Full Color & Customizable Postcard Order Form

Customize the postcard backs to include spray schedules, detection announcements or emergency contact numbers.

WEST NILE VIRUS HAS BEEN DETECTED IN YOUR AREA!

DRAIN standing water around the house weekly since it's where mosquitoes lay eggs, including: tires, cans, flowerpots, clogged rain gutters, rain barrels, toys, and puddles.

DUSK & DAWN are when mosquitoes that carry the virus are most active, so limit outdoor activities or take precautions to prevent mosquito bites.

DEET is an effective ingredient to look for in insect repellents. Always follow label instructions carefully.

DRESS in long sleeves and pants during dawn and dusk or in areas where mosquitoes are active.

WEST NILE VIRUS disease is rare, but if you have symptoms including high fever, severe headache and stiff neck, contact your health care provider immediately.
